

過敏性肉芽腫性血管炎

Eosinophilic granulomatous polyangitis

何瑋立

台中榮民總醫院嘉義分院過敏免疫風濕科

Here comes a story about a man who had the past history of allergic rhinitis since the childhood and recent onset of asthma for 2 years. Something changed his life a lot and made him very stressed in his thirties. And, we will go on the review of eosinophilic granulomatosis with polyangiitis (EGPA), traditionally termed as Churg-Strauss syndrome. This is a rare systemic vasculitis that affects small-to-medium-sized vessels and is associated with asthma and eosinophilia.
